

# Laser Surface Treatment, Coating Removal and Cleaning

**General Lasertronics Corporation (GLC)** leads the way in applying high-power laser energy to the tasks of surface treatment, coating removal, cleaning and decontamination. GLC was first to deploy portable, flexible laser systems to aircraft maintenance organizations, conventional and nuclear power plants, and restoration projects. Our systems safely and effectively harness laser power to replace hand sanding, scraping and media blasting, and to replace the use of chemical etchants and solvents. GLC products save money by reducing or eliminating hazardous waste disposal, by improving operator health and safety and by reducing training and processing times.

GLC tackles tough cleaning and decontamination tasks such as lead paint abatement, selective removal of individual coating layers, small pipe and tube cleaning, surface treating and cleaning of thermally sensitive composite materials.

## 100W to 400W Portable Systems

## Workheads for Every Application

Handheld

Handheld Color

Confined Space

Tube Crawler

Fixed Angle

Robot-Mounted

### Applications:

- Surface cleaning
- Paint, sealant and coating stripping
- Selective stripping down to the primer
- Specialty coating removal
- Radioactive decontamination
- Selective layer removal and contouring
- Pipe and tube cleaning and decontamination
- Removing oxide, rust and mill scale
- Preparing surfaces for bonding, coating, and welding

| GLC Model   | Laser Power Options*   |                     |                     |
|---|--|---------------------|---------------------|

| <b>GLC- T — Tube Crawler</b><br> Decoat or clean inner surfaces of tubes, pipes or vents with inner diameter $\geq 2.5$ cm<br>Accommodates bends as specified as well as extended pipe/tube lengths  | Alternative power options for the GLC-T product line are available to meet customer task requirements and tube sizes |                     |                     |

- All models include Laser, Water Chiller, Controller, and Safety Interlocks.
- Standard fiber umbilical length 15 meters. Optional lengths up to 50 meters.
- \* Power Options refer to continuous wave (CW) rating of laser output.
